Portfolio: https://cherukurideepak-sai.github.io/3d-portfolio/

PROFESSIONAL SUMMARY

MSc Computer Science student at the University of East London with foundational skills in Python, SQL, Java, TensorFlow and AWS. Interested in machine learning, deep learning and computer vision. Academic project experience includes comparing deep learning models for image classification and designing an AWS-based warehouse automation architecture. Completed technical training in computer vision, deep learning and neural networks. Course Representative for MSc Computer Science with experience in communication, organisation and representing student feedback. Seeking a graduate AI/ML role to contribute to technical projects, solve problems and deliver assigned tasks within deadlines.

TECHNICAL SKILLS

- **Programming:** Python, Java, SQL
- **AI/ML:** CNN, transfer learning, image classification, deep learning fundamentals, model evaluation
- **Tools:** TensorFlow (coursework), MATLAB
- **Computer Vision:** Image preprocessing, data augmentation, object detection fundamentals
- **AWS:** EC2, S3, RDS, Lambda, VPC, IAM, CloudWatch fundamentals
- **Professional:** Debugging, testing, task planning, teamwork, communication, meeting deadlines

EDUCATION

MSc Computer Science

University of East London, United Kingdom

Expected graduation: 2028

Bachelor's in computer application

S.V university, India

2021-2024

PROFESSIONAL EXPERIENCE

Python Developer Intern | Atrisol Tech

Jan 2024 – May 2024

- Executed assigned Python development tasks and delivered project components within agreed deadlines.
- Wrote, debugged and tested Python code to meet specified functional requirements.
- Investigated coding errors and implemented corrections to improve code reliability.
- Prioritised assigned tasks, monitored progress and communicated blockers to maintain project timelines.
- Collaborated with team members to clarify requirements, review feedback and complete project deliverables.

Python Developer Intern | Maang Technologies

Dec 2024 – Oct 2025

- Completed assigned Python development activities according to project requirements and timelines.
- Developed and refined code components, applying debugging and testing techniques to identify errors.
- Analysed task requirements and translated them into manageable development activities.
- Evaluated application behaviour through basic testing and corrected identified issues.
- Coordinated with team members to clarify technical requirements and communicate task progress.

Customer Assistant | Sainsbury's, UK

May 2026–Present

- Delivered customer service while maintaining accuracy and following store operating procedures.
- Coordinated daily tasks with colleagues to support efficient store operations.
- Managed competing priorities while balancing employment with postgraduate study..

TECHNICAL PROJECTS

Comparative Analysis of Deep Learning Models for Multi-Class Image Classification

Python, TensorFlow, CNN, ResNet50, DenseNet121

- Compared **3 deep learning architectures** for an **8-class image classification** task.
- Applied image preprocessing, data augmentation and dataset splitting techniques during model preparation.
- Evaluated model performance using test accuracy, confusion matrices, classification reports and ROC curves.
- Achieved the following reported coursework test accuracies: custom CNN **83.80%**, ResNet50 **99.81%**, and DenseNet121 **99.14%**.
- Analysed classification errors and the benefits of transfer learning when distinguishing visually similar image categories.

AWS Cloud-Based Warehouse Automation — Architecture Case Study

AWS EC2, S3, RDS, Lambda, VPC, IAM, CloudWatch

- Designed a proposed cloud architecture using **7 AWS services** to address warehouse inventory management requirements.
- Mapped functional requirements for inventory updates, data storage, access control and monitoring to appropriate AWS services.
- Documented cloud configuration activities and investigated IAM permission issues encountered during implementation.
- Assessed scalability, security, availability and cost considerations for the proposed architecture.

LEADERSHIP

Course Representative — MSc Computer Science

University of East London | [Start Year–Present]

- Represented MSc Computer Science students by communicating feedback and academic concerns to university staff.
- Facilitated communication between students and staff to support the student learning experience.
- Coordinated student feedback and demonstrated leadership, organisation and communication skills.

CERTIFICATIONS AND TRAINING

- **Gemini for Application Developers** — [Issuing Organisation, Date]
- **Computer Vision Onramp** — MathWorks, April 2026
- **Deep Learning Onramp** — MathWorks, February 2026
- **Explore Convolutional Neural Networks** — MathWorks, March 2026
- **MATLAB Onramp** — MathWorks, February 2026
- **Object Detection with Deep Learning** — MathWorks, April 2026
- **Data Centre Infrastructure and Architecture:** Data centre hardware, IT infrastructure, design, architecture and infrastructure management.
